GANESH MAURYA

AI Trainer & Software Developer | Code Review · LLM Evaluation · Full-Stack Development

Pune, Maharashtra, India · samratganeshmaurya194@gmail.com · linkedin.com/in/samratganesh-maurya-ab134226b

PROFESSIONAL SUMMARY

B.Tech Computer Engineering graduate (2026) and AI Trainer who reviews, evaluates and improves AI-generated code. Experienced in judging model-written JavaScript and Python for correctness, logic, efficiency and readability, and rewriting flawed responses into clean reference solutions for LLM training. Brings a full-stack foundation in JavaScript, Node.js, Python and SQL, hands-on LLM integration with the Claude API, and a detail-oriented, rubric-driven way of working.

EXPERIENCE

Development Specialist — Para AI Labs (Remote) Jun 2026 – Present

- Develop and integrate AI-driven tools into software applications.
- Test code and optimise data workflows to meet strict project requirements.

AI Trainer, Code Review — Outlier AI (Remote) Jan 2026 – May 2026

- Reviewed AI-generated JavaScript and Python for correctness, logic errors, edge cases, efficiency and readability.
- Rewrote flawed model responses into high-quality reference solutions used as LLM training data.
- Scored outputs against quality rubrics and wrote clear justifications for every issue found.

Software Development Engineer Intern — Bluestock Fintech (Remote) Oct 2025 – Nov 2025

- Built and tested production full-stack features in an Agile team and took part in peer code reviews.
- Worked with deployment workflows and real-user release cycles.

Web Developer Intern — Right Path Education Hub Pvt. Ltd. Sep 2024 – Nov 2024

- Designed and built a fully responsive website from scratch in HTML5, CSS3 and JavaScript.
- Optimised the MySQL schema for faster retrieval, integrated third-party APIs, and earned a completion certificate.

PROJECTS

AI Gmail Auto-Responder — Claude API, JavaScript, Zapier 2026

- Connected the Claude API to Gmail through Zapier to read incoming email and draft context-aware replies; designed prompt logic, request handling and error handling.

Gram Panchayat Portal — HTML, CSS, JavaScript 2026

- Mobile-first web app for village governance data, active works tracking, events and law references; deployed on GitHub Pages.

Full-Stack Hackathon App — JavaScript, MySQL, REST APIs 2025

- Responsive frontend with a database-driven backend, built in 36 hours at Vive Coding 2025.

SKILLS

AI Training & Evaluation: LLM code review, response ranking, rubric-based QA, bug fixing, reference solutions, data annotation
Generative AI: Prompt engineering, Claude API, Claude Code, Model Context Protocol, LLM integration, ML & NLP fundamentals
Languages & Backend: JavaScript (ES6+), Python, C++, SQL, Node.js, Express, REST APIs, MySQL, MongoDB
Web & Tools: HTML5, CSS3, responsive design, Git, GitHub, VS Code, Postman, Zapier, Neo4j

EDUCATION

B.Tech, Computer Engineering — Shri Ram Institute of Technology (RGPV) Sep 2022 – Jun 2026

CGPA 7.35 / 10 · Focus: Computer Science, Artificial Intelligence & ML, Cyber Security

CERTIFICATIONS

- Generative AI Mastermind — Outskill (Jun 2026)
- Anthropic (May 2026): Claude 101, Claude Code in Action, Introduction to Model Context Protocol, Introduction to Claude Cowork, AI Fluency
- Google (May 2026): Introduction to AI, Start Writing Prompts like a Pro
- Cisco Networking, Advanced Learner 84/100 (Dec 2025) · Neo4j Certified Professional (Jul 2025)
- Machine Learning — Udemy (Oct 2024) · Cybersecurity — Google, IBM SkillsBuild, Cisco (2024–2025)

HACKATHONS

- Smart India Hackathon and IIT (ISM) Dhanbad Hackathon — national-level participant
- SRIT Institute Hackathon — built and presented a working prototype
